

Zocular® INSTRUCTIONS & TIPS

Directions for ZocuWipe:

1. Open package and unfold ZocuWipe towelette into a rectangle. Remove any makeup, mascara, or moisturizer around eyes prior to applying ZocuWipe. Make sure hands are clean. Use ZocuWipe in the morning.

2. Wrap ZocuWipe towelette over fingers.
3. Gently close eyelids and lightly scrub along the eyelash line for 10-15 seconds until white micellar foam bodies called Zocusomes develop. Avoid direct eye contact. Do not scrub the skin of the upper or lower eyelid, only along the eyelash line using horizontal movements.

4. Flip ZocuWipe towelette to the other side and repeat similar steps for the other eye. Use a fresh, new ZocuWipe if Zocusomes do not form or if there's any concern about contamination.

5. Do not rinse after applying ZocuWipe. Allow applied area to dry.
6. Follow routine skin regimen as normal.

Directions for ZocuFoam:

1. Wash hands prior to using ZocuFoam cleanser. May also use ZocuFoam to help remove makeup around the eyes and on the face.

2. Place one pump of ZocuFoam onto fingertips. Split ZocuFoam onto fingertips of other hand so that both hands now have ZocuFoam on them.

3. Gently close eyelids and use the fingertips to lightly scrub ZocuFoam along the eyelash line for 10-15 seconds. Avoid direct eye contact.

4. Rinse with water. ZocuFoam can be used in combination with ZocuWipe or ZocuZap to attain maximal results. Use ZocuFoam in the morning and/or at night.

5. Follow routine skin regimen after using ZocuFoam.

Directions for ZocuZap:

1. Open package and unfold ZocuZap towelette into a rectangle. Remove any makeup, mascara, or moisturizer around eyes prior to applying ZocuZap. Use ZocuZap at night.

2. Apply ZocuZap in circular motion over affected area for 5-10 seconds until tiny white foam bodies called Zocusomes develop. Do Not rinse after applying ZocuZap – just go to sleep.
